SUMMARY STATEMENT

At the age of 25, I have 4 years of software development experience with many different languages and platforms such as **HTML/CSS/JavaScript, TypeScript, ReactJS, NextJS, Flutter, AWS, Git**. Confident communication and willingness to devote myself to work are my next strengths to create valuable and quality products.

SKILLS

Hard Skills

- Programming Language: HTML – CSS/SCSS – JavaScript/TypeScript, Dart.
- Frameworks: ReactJS, NextJS, Flutter.
- Libs: Redux/Redux Toolkit/Redux Saga, Ant Design, MUI, React Hook Form, Tailwind CSS.
- Tools & Platforms: Git, Firebase, Cloudinary, AWS, Jenkins, Jira.
- Backend: Java.
- Database: SQL Server.
- Source code: Gitlab, Bitbucket.
- Testing: Vitest.
- Language: Vietnamese (native), English (Intermediate).

Soft Skills

- Critical Thinking and Problem Solving, Time Management, Debugging Situation.
- Diagnose, Analytical Skills, Debating, Teamwork.

CERTIFICATES

React – The Complete Guide 2023 (incl. React Router & Redux) by Udemy

Redux Saga with React: Fast-track Redux Saga intro course by Udemy

PROFESSIONAL EXPERIENCE

TVT GROUP - PAYDAES

Jul 2024 – Now

ReactJS Developer

A professional human resource management system developed by TVT Group under the guidance of the Paydaes team. The system is designed to be highly flexible and scalable, enabling companies worldwide to configure and customize it to suit their specific needs. Core features include clock-in/clock-out tracking, employee information management, payroll calculation, and request approval workflows tailored to the internal processes of each organization.

- Enhanced responsiveness and interactive UI with Ant Design.
- Standardized all output with a new, responsive, mobile-first approach and strategy.
- Deep understanding of ReactJS framework - Have experience in creating, designing the core template layouts.
- Implemented Restful APIs and ensured robust state management using Redux for seamless application functionality and scalability.
- Expand features, refine code, and improve processes, producing smoother operations and enhancing user engagement.
- Collaborated with product team members to implement new feature developments.
- Collaborate with clients to propose optimal solutions for the project and meet their expectations.
- Manage source code and propose implementation ideas for testing environments.

Technology: ReactJS, TypeScript, Ant Design, React Hook Form, Redux Toolkit, Gitlab.

Mentor for the internship group from Greenwich University

Jun 2024 – Aug 2024

Training ReactJS

Front-End Developer training program jointly organized by TVT Group and Greenwich University, designed for 7 interns over a duration of 3 months.

- Planned daily learning and practice schedules.
- Fostered team cohesion and regularly monitored the progress of each member.
- Proposed ideas and provided guidance for mid-term and final assignments during the course.

TVT GROUP - FLAT

May 2024 – Jul 2024

NextJS Developer

A website focusing on franchising opportunities for food service establishments. It also allows advertising new products through banners or blogs. Additionally, it manages marketing activities when dealing with customers and includes tools for calculating the cost of opening a store.

- Program the application's interface using ReactJS and Material UI (MUI).
- Develop UI/UX based on customer requirements, implement Restful APIs, and manage state.
- Proactively liaised with the design team and project manager to ensure efficient and timely delivery of significant projects.

Technology: NextJS, TypeScript, MUI, Redux Toolkit, Gitlab.

TVT GROUP - FRCMS

Apr 2024 – Jun 2024

NextJS Developer

A website for monitoring the ships & IoT fire sensor devices. Data is collected from devices and shown on the Web for monitoring and control. They warned users when their ship had a problem such as smoke, fire, etc...

- Program the application's interface using ReactJS and Material UI (MUI).
- Develop UI/UX based on customer requirements, implement Restful APIs, and manage state.
- Proactively liaised with the design team and project manager to ensure efficient and timely delivery of significant projects.
- Optimize codebase and enhance system performance for improved efficiency and scalability.

Technology: NextJS, MUI, Redux Toolkit, Bitbucket.

RAVER.VN 2.0

Feb 2024 – Apr 2024

NextJS Developer

Project to improve the website of a large Electronic Dance Music Community in Vietnam. Bringing a new interface with outstanding features to attract and reach domestic and foreign music lovers.

- Program the application's interface using NextJS.
- Upgrade new features to increase user experience.
- Restful API through Wordpress.

Technology: NextJS, TypeScript, Tailwind CSS, Nginx, Wordpress, Gitlab.

FPT Software (AIRFORCE1 – KANSAI AIRPORT GROUP)

Apr 2022 – Dec 2023

ReactJS Developer and Devops

Core project of Kansai Airport Group (Japan). The system created to manage the group's projects and contracts is abbreviated as IRCA (Investment, Running, Contract, Approval).

- Program the application's interface using ReactJS.
- Gained practical experience interface in web development using HTML5/CSS3/JavaScript.
- Supported to Backend developer to fetch API and to display data via the screen of device.
- Component performance optimization for a wide range of web- capable devices and browsers.
- Participated in code reviews and learned best practices for writing clean, maintainable, and well-documented code.
- Lead a team of 5 members, working together to ensure the quality of the source code before planning deployment and uploading it to the server.
- Set up AWS services and CI/CD tool to operate the project to achieve the best efficiency.
- Provide guidance and problem solving to team members to develop their skills and ensure success.

Technology: ReactJS, TypeScript, Ant Design, AWS, Gitlab, Jenkins, Nginx, Jira.

FPT Software (WR_LIFEAPP - WOORIEN)

Jun 2021 – Nov 2021

Intern Mobile Developer

Dog care application of Woorien Company (Korea). The application was created to care for and train dogs through exercise videos from basic to complex.

- Program the application's interface using Flutter.
- Cooperate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Use Bloc Pattern to manage state for the project.
- Research and install new Flutter packages.

Technology: Flutter (Dart), Gitlab, Jira.

PROJECT

Portfolio (slimvu.me) [🔗](#)

Built a responsive portfolio website that adapts seamlessly across devices, showcasing both design skills and technical proficiency through the integration of modern libraries and tools.

Technology: Astro, ReactJS, Tailwind CSS, EmailJS, ThreeJS.

EDUCATION

FPT University (Vietnam)

2018 - 2022

Software Engineering (GPA: 7.3)
